PO Box 4187
CASTLECRAG NSW 2068

To Whom It May Concern:

This letter is to confirm that Andrew Murray has been part of the Climate Smart Home Service program since March 2009. This is a statewide Queensland Government program designed to educate people in energy consumption and savings. This was done through installation of a wireless energy monitor, energy efficient globes and a water efficient showerhead.

During this time Andrew has conducted over 1000 home visits in the Cairns area. His duties also included stock control, toolbox talks, reconciliation of weekly jobs, and use of a computer program for recording customer details.

I found Andrew to be courteous and professional in all aspects of our program.

Regards

Jason Mills

Regional Supervisor
